

ARBITRATION BETWEEN
NEWFOUNDLAND AND LABRADOR
AND
NOVA SCOTIA
CONCERNING THE DELIMITATION OF
THEIR OFFSHORE AREAS

PHASE TWO

MEMORIAL OF
NEWFOUNDLAND AND LABRADOR

ANNEX OF FIGURES

17 AUGUST 2001

ILLUSTRATIONS

Figure 1: The Geographical Setting

Figure 2: The Inner Concavity and the Outer Area

Figure 3: The Relevant Coasts

Figure 4: Relevant Area Based on Perpendiculars to General Direction of Coasts to 200 NM

Figure 5a: The Two Separate Coastal Fronts of SPM

Figure 5b: Equidistance Applied to SPM Showing the Fanning Out to Either Side of the Islands

Figure 6: The Seaward Extensions of Opposite Coasts Meet and Overlap; The Projections of Adjacent Coasts Do Not

Figure 7: Effect of Convex and Concave Coasts Using Equidistance

Figure 8: Application of Half Effect in the *Anglo-French Continental Shelf Case*

Figure 9: Application of Half Effect in *Tunisia v. Libya*

Figure 10: The Bijagos Islands Were Given Little Effect in *Guinea v. Guinea-Bissau*

Figure 11: Minimizing the Distortion of Incidental Features in *Eritrea v. Yemen*

Figure 12: Minimizing the Distortion of Incidental Features in *Qatar v. Bahrain*

Figure 13: The Delimitation in the *Gulf of Maine Case*

Figure 14: Total Area Attracted by Sable Island Using Equidistance

Figure 15: Cut-off Effects in the Inner Concavity and North Sea Using Equidistance

Figure 16: The Lengths of the Relevant Coasts

Figure 17: The First Segment - A Bisector in the Area of Cabot Strait

Figure 18: The Second Segment - An Adjusted Bisector Intersecting the Closing Line of the Inner Concavity

Figure 19: Canada's Proposed "Converging Seaward Extensions" of Newfoundland and Nova Scotia

Figure 20: The Outer Segment - A Perpendicular to the Closing Line of the Inner Concavity

Figure 21: The Gulf of St. Lawrence

Figure 22: The Newfoundland and Labrador Line

Figure 23: A Perpendicular Reflects the Basic Structure of the Coastal Geography in the Outer Area

Figure 24: Equity of the Result – Proportionality Test.
