

ARBITRATION BETWEEN  
NEWFOUNDLAND AND LABRADOR  
AND  
NOVA SCOTIA  
CONCERNING THE DELIMITATION OF  
THEIR OFFSHORE AREAS

PHASE TWO

MEMORIAL OF  
NEWFOUNDLAND AND LABRADOR

17 AUGUST 2001

INTRODUCTION.....	1
CHAPTER I        THE TERMS OF REFERENCE.....	7
CHAPTER II       THE GEOGRAPHICAL SETTING.....	11
I.     Introduction .....	11
II.    The Geographical Configuration .....	12
A.    The Gulf of St. Lawrence .....	12
B.    The Inner Concavity and the Outer Area .....	13
C.    The Relevant Coasts.....	14
D.    The Character and Features of the Relevant Coasts.....	15
E.    The Relative Extent of the Coasts.....	19
F.    The Relevant Offshore Area .....	21
III.   A Single, Broad Continental Shelf .....	22
IV.    Conclusion.....	23
CHAPTER III      THE APPLICABLE LAW.....	25
I.     Introduction .....	25
II.    Principles of International Law Governing Maritime Boundary Delimitation.....	26
III.   The Fundamental Norm .....	30
IV.    Relevant Circumstances.....	32
A.    Coastal Geography as the Essential Factor .....	32
B.    Natural Prolongation.....	36
C.    The Limited Relevance of Non-geographical Considerations.....	38
(a) Economic Factors.....	38
(b) The Conduct of the Parties.....	40

V.	Equitable Principles .....	41
A.	The Seaward Extensions of the Coasts .....	41
B.	Non-Encroachment and the Cut-off Effect .....	43
C.	Proportionate and Disproportionate Effects .....	44
	(a) The Potentially Disproportionate Effect of Incidental Features .....	44
	(b) The Relative Extent of the Coasts .....	46
VI.	Equitable Solutions .....	48
A.	Equidistance and its Variations .....	49
B.	Islands as Potential Sources of Inequity .....	56
C.	The Treatment of Islands in the Most Recent Cases.....	59
D.	Coastal Fronts and the Use of Bisectors and Perpendiculars .....	61
VII.	Conclusion.....	64
CHAPTER IV	THE CHOICE OF A METHOD .....	66
I.	Introduction .....	66
II.	Equidistance is Not Appropriate in this Case.....	69
	(a) The Prevalence of Distorting Incidental Features in the Delimitation Area .....	69
	(b) A Substantial Disparity in Coastal Lengths .....	73
	(c) An Inequitable Cut-off of the Coasts of Southwestern Newfoundland .....	74
	(d) Encroachment on the Seaward Projections of Southeastern Newfoundland .....	77
	(e) The Unique Political Geography .....	78
III.	An Equitable Delimitation.....	79
A.	Introduction.....	79

B.	The First Segment: A Bisector in the Area of Cabot Strait.....	80
C.	The Second Segment: An Adjusted Bisector Intersecting the Closing Line of the Inner Concavity.....	83
D.	The Final Segment: A Perpendicular to the Closing Line of the Inner Concavity.....	86
E.	The Gulf of St. Lawrence.....	90
IV.	Conclusion.....	91
CHAPTER V	THE EQUITY OF THE RESULT.....	93
SUBMISSION	.....	97

APPENDIX A TERMS OF REFERENCE

APPENDIX B LIST OF STATUTORY INSTRUMENTS AND AUTHORITIES

APPENDIX C TECHNICAL INFORMATION

ANNEXES:

I STATUTORY INSTRUMENTS (1 Volume)

II AUTHORITIES (2 Volumes)

III FIGURES (1 Volume)

## ILLUSTRATIONS

**Figure 1:** The Geographical Setting

(after page 11)

**Figure 2:** The Inner Concavity and the Outer Area

(after page 13)

**Figure 3:** The Relevant Coasts

(after page 14)

**Figure 4:** Relevant Area Based on Perpendiculars to General Direction of Coasts to 200 NM

(after page 21)

**Figure 5a:** The Two Separate Coastal Fronts of SPM

(after page 43)

**Figure 5b:** Equidistance Applied to SPM Showing the Fanning Out to Either Side of the Islands

(after page 43)

**Figure 6:** The Seaward Extensions of Opposite Coasts Meet and Overlap; The Projections of Adjacent Coasts Do Not

(after page 51)

**Figure 7:** Effect of Convex and Concave Coasts Using Equidistance

(after page 53)

**Figure 8:** Application of Half Effect in the *Anglo-French Continental Shelf Case*

(after page 57)

**Figure 9:** Application of Half Effect in *Tunisia v. Libya*

(after page 58)

**Figure 10:** The Bijagos Islands Were Given Little Effect in *Guinea v. Guinea-Bissau*

(after page 59)

**Figure 11:** Minimizing the Distortion of Incidental Features in *Eritrea v. Yemen*

(after page 60)

**Figure 12:** Minimizing the Distortion of Incidental Features in *Qatar v. Bahrain*

(after page 60)

**Figure 13:** The Delimitation in the *Gulf of Maine Case*

(after page 62)

**Figure 14:** Total Area Attracted by Sable Island Using Equidistance

(after page 71)

**Figure 15:** Cut-off Effects in the Inner Concavity and North Sea Using Equidistance

(after page 75)

**Figure 16:** The Lengths of the Relevant Coasts

(after page 81)

**Figure 17:** The First Segment - A Bisector in the Area of Cabot Strait

(after page 82)

**Figure 18:** The Second Segment - An Adjusted Bisector Intersecting the Closing Line of the Inner Concavity

(after page 83)

**Figure 19:** Canada's Proposed "Converging Seaward Extensions" of Newfoundland and Nova Scotia

(after page 87)

**Figure 20:** The Outer Segment - A Perpendicular to the Closing Line of the Inner Concavity

(after page 89)

**Figure 21:** The Gulf of St. Lawrence

(after page 91)

**Figure 22:** The Newfoundland and Labrador Line

(after page 92)

**Figure 23:** A Perpendicular Reflects the Basic Structure of the Coastal Geography in the Outer Area

(after page 94)

**Figure 24:** Equity of the Result – Proportionality Test

(after page 95)
